Home.tsx

“Sungur Electronics” company is specialized in the field of development and application of system solutions with regard to modern information technologies (transmission facilities, information management, storage and processing) communication and security systems at the market of Turkmenistan starting from 2010. Depending on requirements of a certain customer business growth we develop and implement customized systems on a turnkey basis or adapt replicated solutions for certain conditions.

Our core asset is a team of professional advisors and technical experts. All our technical specialists regularly undergo training abroad. Operational excellence of our staff is confirmed by numerous certificates and diplomas of leading worldwide manufacturers and, which is most important, by successfully implemented projects.

Solutions and services

All services (ссылка)
